## Personal data

---

**Name:** Alexander M.

### Technical Knowledge and Skills

Angular, Vue.js, Node.js, HTML, CSS

Hello!

I am a web software engineer working primarily on complex websites and applications with diversified back-end and rich front. I am interested in building functional, stable and secure systems able to live under high load and exchange data between multiple servers at a high speed giving users the best web surfing experience. My primary skills lie in a single page applications development.

For the last three years I've successfully finished 8 complex SPA projects from scratch using innovative IT technologies and Web APIs. I have a solid experience in a number of different Web-related areas including a great number of HTML5 APIs, RESTful APIs, mobile-first adaptive PSD to HTML translation, social networks integration, web security, design patterns, web sockets, server caching, I/O filtering and validation, unit testing, regular expressions, SQL requests optimization, TCP/IP stack protocols, setting up remote web servers and many other things. These expertise make me a strong full stack developer able to provide my customers with best results in various aspects of a modern web development. To hire me for your project please call or mail my manager on Soshace using contacts given above.

## Education

---

**Russian Federation**

**Information technology, Master's degree, Voronezh State University**
