

Curriculum vitae

Personal data

Name: Sergey G.

Technical Knowledge and Skills

React, Angular, Meteor, Node.js, HTML, CSS

Hello!

I'm web development expert with more than 10 years experience. I have Master degree in Applied Mathematics and Computer Science.

Currently work as full-stack developer (Ruby on Rails), creating web applications and API for mobile applications.

During my career I mastered multiple frameworks: Node.js, Meteor, React, Angular. Also I perfectly know jQuery and CSS which is always useful for frontend development.

Before I started to work with Ruby on Rails, I worked as full-stack ASP.NET developer about 6 years. Completed many projects using Asp.net Web Forms, Asp.net MVC, Core. Created multiple e-commerce applications using NopCommerce framework. Worked with CMS frameworks, e.g. Sitefinity.

I will be glad to join your team or will work on your project alone. I'm always ready to learn any cutting edge technology or use all my experience of old good technologies!

Education

Russian Federation

Master's Degree in Mathematics, Mechanics and Computer Science., Rostov State University
