Education

Work experience

April 2018 -
Present

A Software Development Company, USA, Remote
Front End Software Engineer

Stack:

- ReactJS,
- Typescript,
- React Native,
- Angular,
- HTML,
- SASS

Responsibilities:

- Developed the main Crossover website, Ignite ACORN, CX Monitor;
- Developed automating tools independently which

increased the productivity of the team from 2.9 to 5.2, almost doubled and continues to increase every day as it is integrated deeper into the workflow;

- The automating tool was a code generator that generated 80 - 90% of the code. This effectively dropped the average one screen development time from 120 to 30 minutes;
- Suggested introduction of Emulators instead of Browser stack, this effectively reduced testing time by 50%.

December 2016 -
Present

**A Software Development Company, United Arab Emirates,
Dubai**

Individual Contributor

Stack:

- ASP.NET MVC(C#),
- HTML,CSS,
- Javascript,
- Android (Java),
- iOS (Swift)

Responsibilities:

- Helped them collect information of businesses by building a web crawler. The crawler collected data for more than 50,000 businesses of UAE;
- Greatly accelerated their go to market time by putting in place proper workflows, a plethora of in house tools;
- Was also involved in bug fixing and improvement of their product which involved working on their website and mobile apps;
