- Angular,
- Vue,
- React,
- MongoDB,
- Nest.js,

- Ionic,
- Nativescript,
- Node.js,
- Express.js.

Responsibilities:

- Created website using the standard HTML/CSS practices and developed single-page applications using Angular, Vue, and React;
- Discussed with clients to gather requirements for their needs, develop custom front-end web development solutions to fulfill client needs and make changes adjustments based on client feedback;
- Designed cross-platform hybrid and native mobile apps using ionic and NativeScript and developed Restful APIs using Node.js, Express.js, and NestJS.

Portfolio

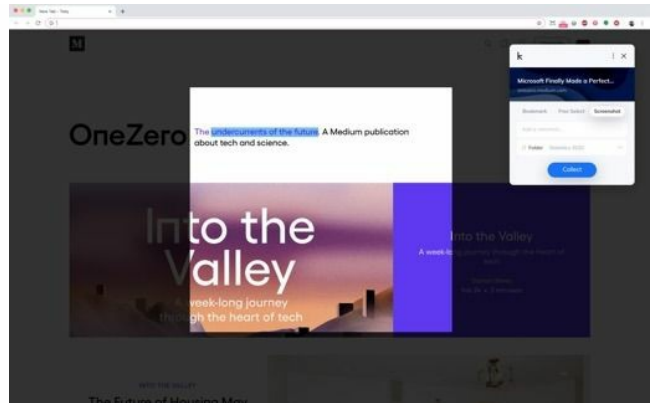

Gambling Facilities Company

February 2021 - March 2022

I developed client-facing betting apps using Angular, helped to formulate an effective, responsive design and turn it into a working theme and plugin. Integrated analytics tools for app statistics tracking. Worked closely with project management and design teams as well as other developers to develop new features on website projects.

Technologies used:
Angular, Javascript

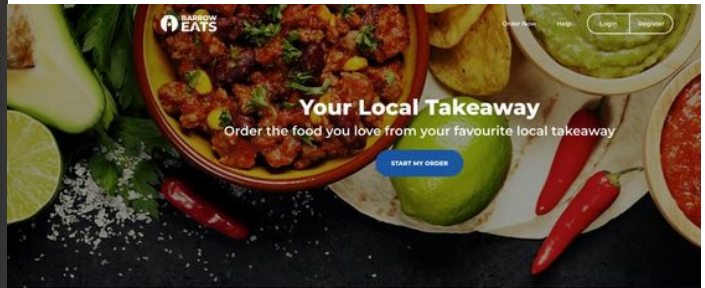

Software Development Company

March 2018 - January 2021

I developed a content management portal in Angular using Django based APIs and improved knowledge on collection browser extensions for Chrome, Firefox, and Edge. Converted UI designs to responsive web apps and extensions and customized GUI for maximum compatibility across platforms and browsers.

Technologies used:
Angular, Javascript, Python, Django
