Curriculum vitae

Personal data

Name: Dragos S.

Technical Knowledge and Skills

Javascript, Node.js, Angular, CSS, MySQL

Dragos is a full-stack developer with over 5 years of experience. He specializes in building web applications using modern stacks (Angular, Node.js, MongoDB), distributed systems using microservices and enterprise integration patterns. His knowledge of low-level programming (C++ background) has helped him with performance optimizations on the projects he's worked on.

Dragos believes that writing code is a form of art. Code must be beautiful, this way one can ensure it can be maintained for years to come with ease. Dragos thinks that software should make people's lives easier, that is why he is eager to listen to what spectacular projects you might have in mind and how he can aid in seeing them online.

Education

October 2012 —
July 2015

Romania
Bachelor of Science: Computer Science And Programming,
University of Craiova

Work experience

September 2017 -
Present

A Software Development Company, Romania
