- React,
- Redux,
- Webpack,
- Sass.

Responsibilities:

- working on a SAAS platform project mainly. Other projects: Android and IOS platforms.
- working in a team of 3 web frontend devs.
- developing a lot of things with Readuc, created the overall architecture, React components with material React.
- started the main project from scratch alone.

June 2018 -  
April 2019

**iGaming software solutions, Armenia**  
Software Engineer

Stack:

- ES5 / ES6+,
- React JS,
- Redux,
- Vanilla Javascript,
- Webpack,
- SASS,
- OOP,
- TFS,
- Git,
- Jira.

Responsibilities:

- working on a Betting platform using Vanilla Javascript;
- developing new, modern Mobile Betting Platform using React, Redux;
- consulting with engineering team members to determine system loads and develop improvement plans;
- estimating work hours and tracked progress using Agile/SCRUM methodology.

May 2018 -  
June 2018

**AI software development company**  
Full Stack Developer

Stack:

- Angular 2+,
- Sass,
- Node JS,
- Express,
- Git,
- Jira.

Responsibilities:

- developing interactive User interfaces using SASS, Angular 5;
- creating RESTful API endpoints using Node JS + Express JS;
- estimating work hours and tracked progress using Agile/SCRUM methodology.

February 2016 -  
May 2018

**Software development company**  
Front End Engineer

Stack:

- Angular 1 - 5,
- Ajax,
- SASS/Less,
- JQuery,
- Cordova,
- PhoneGap,
- Gulp,
- Grunt,
- Asana,
- Trello,
- Git.

# SAAS Platform-Management System

This is the first food delivery service in Armenia. The joint office is located in Yerevan, Armenia. The service operates out of Tbilisi, Minsk, and Kiev. The staff of over 1,000 employees is growing every day due to our rapid development.

I am a Team lead of front-end development. We - 4 skilled developers, are working on the SASS platform for the company. The below-attached screenshots are just a small part of the very big system. Also, we have developed a new website. We haven't connected the API yet, as our backend team has not finished it.

Technologies used:

React

## Betting (Sport) platform for partners June 2018 - April 2019

A privately held company providing Omni-channel iGaming software solutions to the online, mobile and land-based verticals. The multi-channel Gaming Platform allows operators to plug-in sportsbook, casino, live dealer and virtual sports modules, and includes an integrated payment gateway, bonus engine, CRM system, and dedicated customer support. Our unique APIs also allow clients to customize the front-end user journey and user experience. With an extensive payment gateway, bonus engine, CRM system, and dedicated customer support 24/7, our market-leading platform provide everything required for fast market entry for our partners. The sportsbook product itself covers 65 sports, taking in 7,500 leagues, and offers more than 3,000 betting markets. It also offers odds on 35,000 live events each month, while the casino solution has 3,000-plus games from major casino suppliers (such as Novomatic, Microgaming, NetEnt and Playson).

I have worked at the company in the Sports Department as a Software Engineer. I was a member of a big team and was involved in two projects: 1) Betting(Sport) Platform Desktop version – developed with Vanilla Js and 2) Betting platform Mobile version – developed with React technology.

Technologies used:  
Javascript, React
