Curriculum vitae

Personal data

Name: Gokhan O.

Technical Knowledge and Skills

Java, MySQL, Angular, AWS

Gokhan has been developing software since he was 15 years old. He is a big fan of Agile methodologies (Scrum and Kanban), automated deployment and continuous integration (Hudson/Jenkins), Core Java and Java EE for Web and mobile development. He's experienced in working in high-paced environments, and good at understanding the domain and software quality requirements. He enjoys working with smart people who have passion for delivering high quality solutions. If he feels that he doesn't know something important today, he will learn it tomorrow.

Gokhan worked with companies from all over the world including USA, Europe, China, Japan and India. He's a great communicator and fluent English speaker.

Education

August 2014 — December 2017	Istanbul, Turkey
	MS Degree in Software Engineering, Bogazici University
	Focused on software architecture, software development process, Data Mining and Machine Learning fields. Implemented fully functioning Recommendation System with Matrix Factorization. Picked up quite some Python skills along the way.
September 2006 — September 2012	Istanbul, Turkey
	BSc Degree in Computer Science, Sabanci University

High Honor Scholarship. 875th best student in quantitative science among 2 million candidates.

Work experience
