Curriculum vitae

Personal data

Name: Ilnur A.

Technical Knowledge and Skills

Javascript, React, HTML, CSS

Inur A. is a Front-end developer with more than 13 years of experience. He has experience in designing and building complex front-end applications. Also he's worked as a team lead for 3 years. He actively uses tests, and writes the code so that tests can be written on it. Ilnur has a lot of experience with scrum and kanban team development methodologies.

Education

August 2006 — **June 2011**	**Magnitogorsk, Russian Federation** **Magnitogorsk Nosov State Technical University**

Work experience

March 2021 - December 2021	**IT Services and IT Consulting Company, Cyprus** Senior Frontend Developer **Stack**: • TypeScript, • React.js, • React hooks, • MobX, • PWA, • SCSS, • CSS Modules,

• Figma.

Responsibilities:
- Developed the PWA version of the site with auto updates;
- Put in order the dependencies in the code, using dependency injection;
- Developed a library of UI components.

| January 2020 - February 2021 | **Internet Publishing Company, Russian Federation**
Senior Frontend Developer |

Internet Publishing Company, Russian Federation
Senior Frontend Developer

Stack:
- TypeScript,
- Node.js,
- React.js,
- Graphql,
- WebGL,
- PixiJS.

Responsibilities:
- Developed business features for the main module with a visual bot editor;
- Initiated code migration from JavaScript to TypeScript in the main project module;
- Moved the project to the latest TypeScript version, which allowed me to identify and fix a lot of bugs;
- Improved the development process by adding few automatic checks for linter and optimizing CI.

August 2016 - December 2019

Internet Company, Russian Federation
Team Lead, Senior Software Developer

Stack:
- Electron,
- TypeScript,
- React.js,
- Rx.js,
- Redix,
- Flux,

- SCSS,
- Google
- Protobuf,
- WebSocket.

Responsibilities:
- Team leading (3 - 4 developers);
- Conduct interviews;
- Develop for 2 client platforms: desktop (for windows, mac, and mac app store) and web (desktop and mobile browsers);
- Develop business logic and architecture of each key feature;
- I participate in discussions on the agreement of Rest API for new features.

Achievements:
- Moved the entire project from Redux to specialized custom architecture (like Flux), which helps us to attain a high speed of development and the ability to maintain different client platforms;
- Initiated code migration from JavaScript to TypeScript for the project and all tests;
- Published the desktop project in the Apple App Store.

August 2014 - August 2016	**Internet Publishing Company, Russian Federation** Senior Frontend Developer

Stack:
- JavaScript,
- TypeScript,
- Node.js,
- React.js,
- Canvas.

Responsibilities:
- Architecture design for new code;
- Discuss and implement new features and support old code;
- Code optimization by speed and memory;
- Provide code fault tolerance, because the product has many different significant parts.

Achievements:
- Developed a prototype of the client part with a new architecture. Receiving the support of the team, we started implementing a new architecture. A year later it became clear that by many criteria the decision was successful;
- Implemented a client part module for simultaneous document editing.

December 2011 - August 2014	**IT Company, Russian Federation** Senior Frontend Developer

Stack:
- JavaScript,
- Angular 1,
- ASP.NET MVC 3.

Responsibilities:
- Designed new front-end architecture and created all base modules on it; Used Angular.js with a clear Rest API.

March 2011 - December 2011	**Software Development Company, Russian Federation** Frontend developer

April 2008 - April 2011	**Software Development Company, Russian Federation** Junior Developer

Responsibilities:
- Java developer on the design and build team inside the corporate billing system of an Internet provider.
